EXPERIENCE

Member of Mensa Czech Republic

Robosoutěž 2016, 1st place

The task was a path-finding robot, it was supposed to follow a black line into a maze, find its way through the maze get on another black line and follow it back to the beginning as fast as possible.

Education course ASURO, 2017

In this course we were given education kits ASURO, and our task was to construct it and implement different actions ranging from line following to detection of obstacles.

Duke of Edinburgh International Award

I achieved all three possible levels – Bronze, Silver and Gold. The highest one in 2018.

Member of CISV Czech Republic

Experience with participation and organization of international youth camps.

Porsche Engineering Student Contest 2022, 2nd place

The goal was to develop software for autonomous car model and compete against other teams in terms of speed and accuracy. The task was to do laps in a circuit marked by black tape and detect road signs and obstacles.
